About Me

Computer Science graduate, currently pursuing **MSc CS (First Year)**.

Strong expertise in **software engineering**, **data engineering**, **analytics**, and **visualization**.

Proficient in Python, SQL, Power BI, and modern data tools.

Hands-on experience with real-world projects like recommendation systems and dashboards.

Skilled at **problem-solving**, **data storytelling**, and delivering actionable insights.

Eagerly seeking internship opportunities in Data Analytics, Data Engineering, and Software Engineering to apply and enhance my technical skills.

Education

Modern College of Arts, Science and Commerce, Shivajinagar — 2025 – Present
Master of Science in Computer Science — *Pune, Maharashtra*

Savitribai Phule Pune University — June 2025
Bachelor of Science in Computer Science — *65.68%*

Technical Skills

Languages: Python, HTML/CSS, JavaScript, Node.js, C, SQL

Libraries: React.js, Pandas, NumPy, Matplotlib, Seaborn, Plotly

Databases: MySQL, MongoDB

Tools: Power BI, Git/GitHub, Microsoft Excel, Jupyter Notebook, VS Code

AI & Emerging Tech: LLM Application Development, Model Context Protocol (MCP), AI Tooling

Problem Solving: LeetCode (Arrays, Strings, Dynamic Programming, SQL)

Projects

Perfume Recommendation System | ***Python, MySQL, Chat-Groq API*** — **January 2025**

- Built an **AI-powered fragrance recommendation engine** using **Llama 3** via Chat-Groq API for natural-language interaction.
- Implemented user preference-based logic incorporating body chemistry and lifestyle factors for personalized suggestions.
- Integrated **MySQL** for structured data storage and efficient retrieval of fragrance metadata.

Weather App | ***React.js, JavaScript, CSS, OpenWeather API*** — **August 2023**

- Created a **real-time weather dashboard** using the OpenWeather API with dynamic UI updates and responsive CSS styling.
- Implemented user input handling, API integration, and error handling for a smooth user experience.

Technical Presentations

Medallion Architecture in Data Lakehouses | **Data Engineering** — **September 2025**

- Presented modern **Medallion Architecture** for Data Lakehouses covering **Bronze–Silver–Gold** layer design and data flow.
- Explained SQL-based transformation processes and best practices in layered, scalable data systems.

ETL Process & SQL Demonstration | **Data Engineering** — **February 2025**

- Delivered a session on **SQL-based ETL workflows** for data transformation, integration, and loading.
- Showcased practical data integration techniques applicable to real-world data warehousing scenarios.

Relevant Coursework

Introduction to Data Engineering (IBM – Coursera, Oct 2024) – Covered ETL processes, data pipelines, and the modern data stack.

Python Essentials 1 (Cisco Networking Academy, Sept 2024) – Gained foundational Python skills: data types, control flow, file handling, and problem-solving.

Deloitte Data Analytics Simulation – Forensic data analysis and data-driven problem-solving.

Tata Data Visualization Simulation – Built executive-ready dashboards and presented key business insights.

Hobbies & Interests

Playing Percussion Instruments – Learning tabla for 8+ years, passed **Madhyama Poorna** exam (Gandharva Mahavidyalaya).

Problem-Solving & Coding – Enjoys solving algorithmic challenges on **LeetCode**.

Watching Movies & Listening to Songs – Interested in exploring different genres of cinema and music.
